SAVANNAH HOLLAN STORY

Savannah was a normal 14-year-old girl that enjoyed doing everyday teenage activities and spending time with her family and friends. In March of 2016, she was diagnosed with Medulloblastoma, a type of pediatric malignant brain tumor.

A brain surgery was required to have the tumor removed and as a result of this, Savannah now has very limited mobility, muscle weakness, dizziness, loss of vision, difficulty

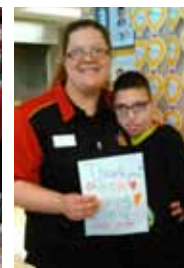

standing without assistance, and loss of appetite resulting in severe weight loss and requiring her to be feeding tube dependent for adequate nutrition. Savannah has undergone numerous rounds of radiation and chemo; despite all she has been through, she continues to have a positive attitude and is a bright light for everyone around her.

Thanks to generous supporters, we are able to assist Savannah's family with her medical bills as well as travel assistance to numerous out-of-town medical appointments. CMN Hospitals purchases multiple pairs of glasses for her because of the monthly change in her vision needs. CMN Hospitals has also purchased a wheelchair for Savannah.

OVER \$181K RAISED BY CASEY'S GENERAL STORES

At the end of Casey's General Stores campaign in February, over \$181,000 was raised to support our local kids with medical needs. In addition to fundraising, Casey's team members went above and beyond in loving and spending time with our CMN Hospitals kids. We would like to express our sincere appreciation to the employees and customers who continue to help make miracles happen.
