# CoxHealth Employee Giving Program

We are not any ordinary organization. We are **CoxHealth**. A family that stands together, united in making a daily difference in our community. As employees – no matter our role – we play a part in getting people back on the road to being well again. We change lives, save lives and improve lives at CoxHealth. Whether adults or children, we also have a way to go the extra mile. The CoxHealth Foundation and Children’s Miracle Network Hospitals offer services and resources that are unique to CoxHealth. As an employee, you have the opportunity to join both the Foundation and CMN Hospitals in providing for our patient’s most important healthcare needs. Won’t you join us in being an **Employee Donor** and invest in improving a life today?

### Amanda:

Blindsided with a diagnosis of breast cancer at 28, the Employee Crisis Fund provided Amanda with assistance that helped get her through. She is now cancer-free.

### James:

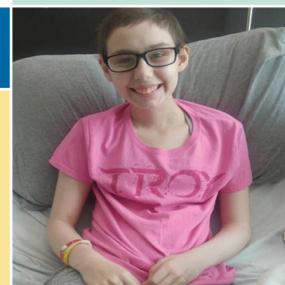

James and his family often travel to specialists out of state for life saving procedures. Thanks to our faithful donors, James will receive the care that he needs to be an active and energetic little boy!

### Tom:

After Tom received new prosthetics, all he needed was a ride to therapy. Our employee donors made sure he got a ride.

## >>>>>> Employee Giving in Action >>>>>>

### Savannah:

Savannah was diagnosed with a brain tumor which required invasive surgeries, chemo and radiation. Your donations ensure that she continues to receive the medical treatment and equipment that she needs.

### Tracy:

Sometimes the most basic piece of equipment can make all the difference in the world when patients are regaining independence. Tracy received a shower chair.

### Grayson:

Grayson was diagnosed with permanent hearing loss at birth. Our employee donors made sure he received hearing aids that were not covered by his parent’s insurance.

Our **employee donors** ensure that patients are empowered with education and assistance navigating through an unfamiliar world of medicine, care, and healing.
